

## Technical Datasheet

- **Grade Name:** Slip Agent Masterbatch
- **Categories:** A high-quality Slip Agent masterbatch containing best kinds of additives in polyethylene resin.
- **Processing Methods:** Blown films, Casting films, etc
- **Applications:** Packing films
- **Features:** Prevent film sticking and pulling helping to increase throughput

Physical Properties			
Properties	Value	Unit	Test Method
Density	0.9	g/cm <sup>3</sup>	ISO 1183
MFI (190 °C, 2.16 Kg)	15	g/10min	ISO 1133
Addition Rate	0.5-1.5	%	Depending on desired effect

### Guideline to Use

- Store in dry and cool place away from direct sun exposure
- The appropriate shelf life is 6 months after producing date
- The recommended dosage is related to film thickness, more thickness needs lower dosage

Typical Properties: These values are not to be considered as product specifications.
